

The better battery.

Company Profile

ZPower is taking the leading role in developing the next generation of rechargeable, silver-zinc batteries for today's rapidly expanding mobile electronics industry. As demand for high-performance, inherently safe, rechargeable batteries continues to grow, ZPower is well-positioned to serve the emerging needs of the mobile marketplace, with special emphasis on notebook computer, cell phone, smartphone, and consumer electronics applications.

Key Benefits of ZPower™ Batteries:

- High Performance – Up to 40% more run time than traditional lithium-ion batteries.
- Clean Technology – Over 95% of primary components can be recycled and reused.
 - ZPower was awarded the “AlwaysOn *GoingGreen* 100” Award for battery materials recycling and reuse.
 - ZPower will offer financial incentives to consumers who recycle ZPower batteries.
- Safety – water-based chemistry is inherently safe.

Operations

ZPower is headquartered in Camarillo, California (USA) where it has state-of-the-art R&D and pilot production facilities.

ZPower Headquarters:

4765 Calle Quetzal
Camarillo, CA, USA 93012
